

Position: Senior Health Outcomes Analyst/Manager

Location: Camberley, Surrey, UK

PharmArchitecture is an independent health outcomes research organization specializing in evidence synthesis, data analysis and decision analytic modeling for market access. We are a small, owner managed consultancy, with a creative, multidisciplinary approach, dedicated to turning complexity into simple, user-friendly solutions. We have established a collaborating network of researchers and clinicians and work closely with similar small consultancies in Switzerland and Canada. To support our growing portfolio we are currently looking for a senior health outcomes analyst with an opportunity for progression to shared ownership of the company.

Projects conducted by PharmArchitecture include: analysis of clinical trial and observational data; analysis and synthesis of published evidence; costing studies; burden of illness studies; development of decision analytic models; medical writing; preparation of economic sections for submission to reimbursement agencies, and the preparation of product value dossiers. We have also been involved in clinical trial design, health policy studies and external audit of submission documents.

For this position you will need excellent technical and interpersonal skills and you will have an opportunity to:

- Think independently, critically, proactively and creatively, yet with scientific rigueur,
- Manage and deliver top-quality projects to agreed timelines,
- Develop proposals based on clients' needs and requirements,
- Build your academic track record through scientific publications and conference presentations,
- Participate in business development and strategic management of the consultancy.

An ideal candidate will have:

- Background in epidemiology, public health, pharmacy or related field,
- Experience conducting systematic reviews and meta-analyses,
- General understanding of health economics,
- Excellent written communication skills,
- Experience writing manuscripts for publication or technology assessment reports,
- Experience working with Excel, using advanced features,
- Desire to continue learning new methods and exploring new opportunities.

In return we offer a competitive salary based on qualifications and experience, flexible working arrangements and equity in the company. If you are interested in this position, please send your CV to Jaro Wex.
